District's spending by operational area

Every year, school districts must decide where to allocate their resources. This pie chart shows how Sedona-Oak Creek Joint Unified School District spent its funding by operational area, including the percentage it spent in the classroom and specifically on instruction.

We categorize districts with certain similar qualities into peer groups in order to help create meaningful comparisons across districts. Sedona-Oak Creek Joint Unified School District's peer group had an average instructional spending percentage of 51.4%. This number can help provide context for Sedona-Oak Creek Joint Unified School District's own instructional spending percentage.

Pie chart showing district spending by operational area

Classroom spending, which includes instruction, student support, and instruction support spending: 64.7%
Instruction: 50.4%
Student support: 9.2%
Instruction support: 5.1%

Nonclassroom spending, which includes administration, plant operations, food service, and transportation spending: 35.3%

Administration: 11.7%

Plant operations: 14.3%

Food service: 4.2%

Transportation: 5.1%

Instructional spending percentage highlights (fiscal years 2001-2022)

We have monitored instructional spending since fiscal year 2001. Below are highlights from Sedona-Oak Creek Joint Unified School District's instructional spending trend showing the most recent year-to-year change and the years it spent its highest and lowest percentages on instruction. Reviewing these instructional spending percentage highlights can provide insight into short-term (year-to-year comparison) and long-term (highest and lowest comparison) trends of a district's allocation of monies to instruction. Depending on how much a district spends in total, even small changes in a district's percentage spent on instruction can equate to large changes in the actual dollars the district spent.

List of the District's instructional spending percentage for the 2 most recent fiscal years, as well as its highest and lowest instructional spending percentages between fiscal years 2001 and 2022

Fiscal year 2021 instructional spending percentage: 51.3%

Fiscal year 2022 instructional spending percentage: 50.4%

Fiscal year of highest instructional spending percentage: 2008

Highest instructional spending percentage: 55.1%

Fiscal year of lowest instructional spending percentage: 2001

Lowest instructional spending percentage: 49.0%

Why monitor school district spending?

Most school district funding is based on the number of students attending, and districts can choose how to spend most funding, so every decision a school district makes to spend on one operational area directly impacts its ability to spend on another. For example, if a district has higher spending in food service, it will have fewer dollars to spend on instruction.

The bar chart below, "Percentage point change in spending by area," illustrates how Sedona-Oak Creek Joint Unified School District's spending by area has changed from the prior year and 5 years ago.

To put the spending percentages in context, it also can be helpful to review a district's per student spending in dollars. For example, 2 districts may spend the same percentage of their resources on instruction, but on a per student basis, 1 district may spend hundreds or even thousands of dollars more than the other.

Operational efficiency measures

Performance measures, such as those shown below, can be used in addition to instructional spending percentage to assess a district's operational efficiency. We have classified the District's spending relative to its peer districts' average as very low, low, comparable, high, very high, or N/A (not available or applicable). High or very high spending when compared to peer averages may signify an opportunity for improved efficiency in that area. A district's data may not be available or applicable if it did not operate a program in that operational area. For example, not all districts operate food service or transportation programs.

Table showing operational efficiency measures relative to peer averages

Operational area—Administration

State average administration spending per student: \$1,088

Peer average administration spending per student: \$1,405

District administration spending per student: \$1,427

District's administration spending per student relative to peer average: Comparable

State average students per administrative position: 63

Peer average students per administrative position: 54

District students per administrative position: 57

Operational area—Plant operations

State average plant operations spending per square foot: \$7.21

Peer average plant operations spending per square foot: \$5.87

District plant operations spending per square foot: \$3.34

District's plant operations spending per square foot relative to peer average: Very Low

State average square footage per student: 167

Peer average square footage per student: 257

District square footage per student: 523

Operational area—Food service

State average food service spending per meal: \$3.25

Peer average food service spending per meal: \$4.05

District food service spending per meal: \$3.67

District's food service spending per meal relative to peer average: Low

State average meals per student: 158

Peer average meals per student: 121

District meals per student: 139

Operational area—Transportation

Transportation performance measures are compared using different peer groups because we have found there are other factors, such as the number of miles a district averages for each rider, that impact transportation spending.

State average transportation spending per mile: \$5.53

Peer average transportation spending per mile: \$4.38

District transportation spending per mile: \$3.98

District's transportation spending per mile relative to peer average: Low

State average transportation spending per rider: \$1,945

Peer average transportation spending per rider: \$2,048

District transportation spending per rider: \$2,054

District's transportation spending per rider relative to peer average: Comparable

Why monitor average teacher salary?

Teacher salaries are one of a school district's most significant costs and have been a topic of high interest in recent years in Arizona. Beginning in fiscal year 2018, the State budget included additional money intended to increase the State's average teacher salary by 20 percent between fiscal years 2017

and 2021. The bar chart below shows how Sedona-Oak Creek Joint Unified School District's average teacher salary changed during this time and immediately after the plan ended, as well as how it compared to the State average. Further, we have broken down what portion of the District's average teacher salary was from Classroom Site fund (CSF) monies.

We have also included a table that displays other student- and teacher-related measures that may provide additional context for how Sedona-Oak Creek Joint Unified School District's average teacher salary may have changed. For instance, changes in a district's teacher population can impact the district's average teacher salary.

Bar chart and table showing average teacher salary and other measures

Fiscal year 2017 district average teacher salary: \$44,530

Fiscal year 2022 district percentage of teachers in first 3 years: 22%

Student achievement

In fiscal years 2020 and 2021 State assessment testing was impacted by the COVID-19 pandemic, with school districts being exempted from conducting State assessments in fiscal year 2020 and not all eligible students participating in fiscal year 2021. With nearly all districts returning to in-person learning in fiscal year 2022, we are presenting the percentage of students who passed State assessments for Math, English Language Arts (ELA), and Science assessments. For fiscal year 2022, we also present an achievement peer group average and the State average for comparison.

To provide additional context, we have included percentage of students who passed State assessments for the District in Math, ELA, and Science for the past 5 fiscal years. Data is not reported for fiscal years 2020 and 2021 for the reasons noted above, and a district may not have data presented for additional years to protect student privacy.
